Computer Science student at WSU with experience in customer service and project coordination, able to deliver exceptional service to clients and work collaboratively with team members. Looking to contribute my creativity and organizational skills to provide support in creating memorable experiences for guests

💼 Work Experience

Web Developer @ Omic   *May 2020 - Jan 2021*

- Designed interactive data visualizations to effectively communicate complex genomics analysis data to clients and stakeholders

- Coded our startup's informational website to showcase our platform **-- https://os.ai**

- Designed and coded an onboarding website to gain support for our fight against COVID-19 **-- https://c19.ai**

- Maintained the company's primary site, a web-based, ML-driven, genomics analysis workspace **-- https://os.omic.ai**

- Designed a suite of custom icons and graphics, which were integrated into the company's websites and applications to enhance user experience

Barista @ Cafe Avole   *June 2019 - Sept 2019*

- Managed all aspects of a small coffee stand, including opening and closing duties, inventory management, and customer service

- Worked independently during shifts, ensuring that the workspace was constantly clean and organized, to allow for a smooth transition from my shift to the next employee's

- Provided excellent customer service, giving drink and pastry recommendations when needed and building strong relationships with regulars to ensure their satisfaction with the service

Bubble Tea Server @ Oasis Tea Zone   *Nov 2018 - Jan 2019*

- Maintained a clean and organized work area during a fast-paced and demanding environment

- Trained new employees on food and drink preparation, customer service, and proper health and safety procedures

- Demonstrated a comprehensive knowledge of our menu offerings and made confident drink recommendations to customers based on their preferences

Farm Equipment Technician @ Charlton Farms   *May 2016 - Aug 2018*

- Operated and maintained a variety of farm equipment, including balers, fluffers and rakes, to efficiently support crop production and harvest processes

- Conducted routine inspections, repairs, and maintenance on equipment to ensure optimal performance and longevity

- Maintained a flexible schedule, allowing me to promptly arrive at the job site at a moments notice to work with my team

🎓 Education

B.S in Computer Science @ WSU   *2021 - Present*
- Graduation date: **May 6th, 2024**

University of Washington   *2017 - 2020*
